

An informative evening with Karima Esmail who will take you through a journey on the severity of the struggles of children with dyscalculia.

She will enlighten us on how these children's needs drastically differ from children with maths difficulties.

**Richmond School, Richmond**

**Thurs 23 April : 6.45 pm — 8.45 pm**

### **Workshop for parents/carers of primary aged children**

Karima is the author of *Dynamo Profiler* and *Dynamo Maths* an award winning assessment and intervention that is being used extensively within schools and is helping reposition children's maths development.

She previously taught as a Senior Lecturer at the University of Hertfordshire and is a respected author of educational books and interactive software.

The evening will provide a hands-on demo of the tools to detect and support dyscalculia. You will also have the opportunity to take up a short trial of the intervention.

Dynamo Maths Profiler screens the child and finds out their strengths and weaknesses in maths, providing some indication as to whether there is dyscalculia or just dyslexic issues. A detailed programme of exercises is then generated in *Dynamo Maths Online*. It is designed for primary children, but can be used with a secondary child if they are operating at a primary level in maths. It is used widely in primary schools. Currently being used as a trial in a local school with 8 children and although they have not been retested yet, the children's confidence and attitude to maths has improved greatly. If the school buys a licence for a child, then it can be used via the password online at home. If the child is showing benefit from the trial, then the school could be approached to continue with a school licence.

**Booking fee: £10 — refundable upon attendance**

Please forward a cheque made payable to 'Dyslexia Network Plus'  
to: Rev J Williamson, 65 Whitefields Drive, Richmond, DL10 7DL

**Dyslexia Network Plus is a local Not-for-Profit organisation, run by parents to support families with dyslexic type difficulties**
